& controls

AIR EQUIPMENT
 COMPANY

products

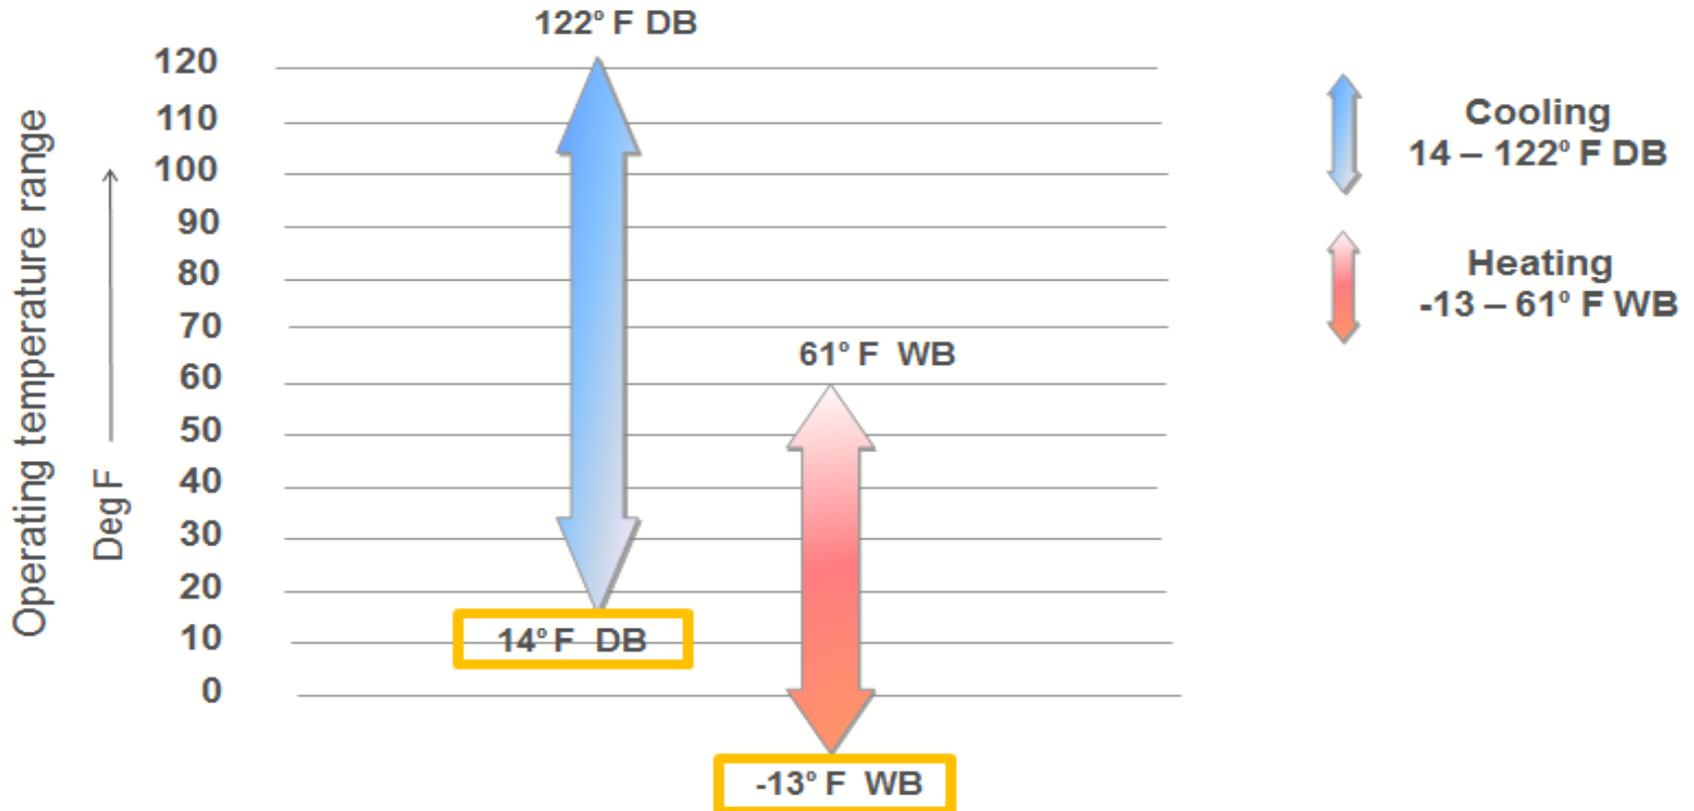

- VFD's
- laboratory controls
- pool dehumidification
- humidifiers
- energy recovery systems
- geothermal WSHP's
- fan coil units
- 100% OA units
- Demand Control Ventilation
- custom AHU's
- VRF systems
- measuring, monitoring, & controls
- rooftop units / splits
- modular chillers
- chilled beams

Variable Refrigerant

Operating Range Cooling / Heating / Heat Recovery

Demand Control Ventilation

- Reduce building energy consumption, carbon footprint and greenhouse gas emissions while enhancing occupant comfort, health, and productivity.
- A facility wide, multipoint sampling system for energy efficient, healthy, ventilation system monitoring and control.

Geothermal WSHP's

- Low installation, retrofitting and expansion costs
- Superior energy efficiency for lower operating costs
- Lower maintenance costs
- Longer system and component life for the lowest life cycle costs

The U.S. Environmental Protection Agency ranks geothermal systems as the most cost-effective space conditioning system available.
